The world's leading computer based training solution.

ClassPerfect

The Perfect Combination of Interactive Learning & Multimedia Broadcasting in the Computer Classroom

ClassPerfect is the only Computer Based Training (CBT) system to offer the powerful combination of real-time, hardware-based multimedia broadcasting plus highly functional classroom management software. And, while it offers the central benefits of hardware-based classroom control systems, **ClassPerfect** costs just half their price. When you need all the benefits of both hardware and software CBT systems, it's time to turn to **ClassPerfect**.

Broadcast Heavy Files with no Delay or Network Burden
With **ClassPerfect**, you'll be able to send graphically rich screens to all your student computers in realtime. You won't experience the frustrating delays and crashes of network-dependent communication. And your IT department will love you for it.

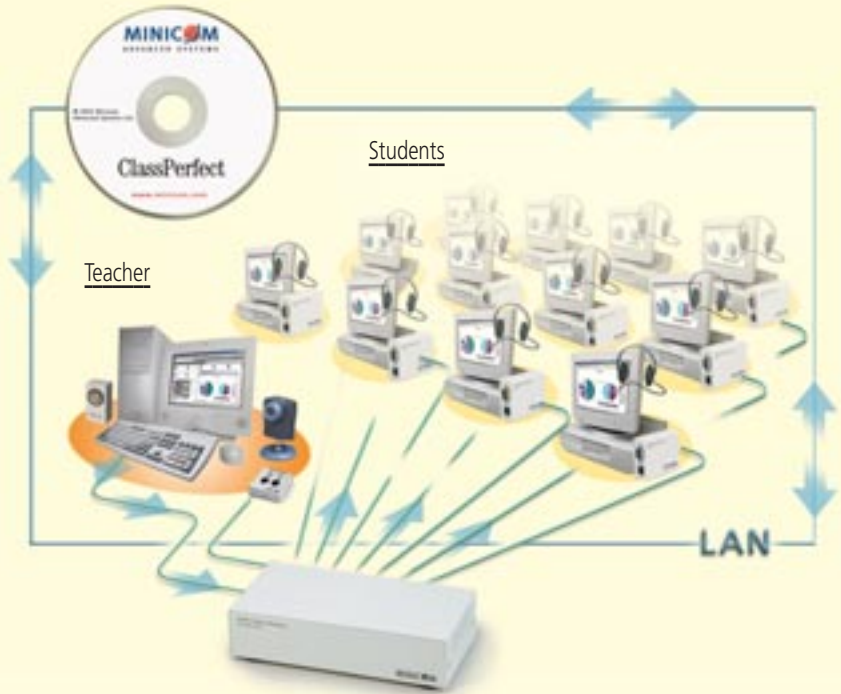

Enjoy Computerized Learning across the Classroom
ClassPerfect lets you take control of your students' keyboard, video and mouse, or darken all your students' screens. You'll be able to set groups of students different tasks. **ClassPerfect** also offers you multiple communication methods - so class members can enjoy CHAT, two way audio, and messaging systems. And the two most widely used functions, darken all and master to all, can be operated either by computer mouse click or by the hand-operated **ClassPerfect** control.

Global Observation and Interaction
In the world of **ClassPerfect**, nothing happens without the teacher's knowledge. The teacher can follow student progress by monitoring their screens and viewing the active tasks of each student. To achieve complete classroom interaction, the teacher can demonstrate concepts or show a student's solution by broadcasting any screen in the class to any other, in real time.

Applications
ClassPerfect's wide range of functions makes it the ideal solution for schools, colleges, universities, and corporate, military and government training centers.

Total Teacher Control
ClassPerfect gives the teacher full command over the class:

- Help a student solve a problem by taking full control of their computer.
- Blackout student screens for undivided student attention.
- Transmit files to/from student computers – distribute and collect tests or hand out grades.
- Run a program simultaneously on all student computers with one click of the teacher's mouse.
- Divide a class into groups and assign separate curricula. For instance, a math application for one group of students and a history test for another.

Software System Requirements

Teacher computer	Pentium III - 700MHz or higher with: • Windows 95, 98, 2000, NT4, ME or XP • 64 MB RAM or higher recommended • 100-BASE-T Network card • 20MB free hard disc space
Network requirements	• TCP/IP Protocol • 100-BASE-T Hub, network switch recommended
Student computer	Minimum Pentium II - 350MHz or higher with: • Windows 95, 98, 2000, NT4, ME or XP • 64 MB RAM or higher recommended • 100-BASE-T Network card
Audio broadcasting requirements	For all computers: • SoundBlaster compatible sound card • Microphone and speakers or headphones
Web camera broadcasting	• Web camera fitted to the teacher's computer

Ordering Information

ITEM	ORDER NO.	DESCRIPTION
