

Date - December 31, 2002  
 Title - New Product Training Room  
 No - 003

<b>ENVIRONMENT</b>	Corporate training room; product training lab; medical device training
<b>MINICOM PRODUCT</b>	Video Display System, Smart 2 KVM Switch (w/ power supply), Smart 4 KVM Switch
<b>CHALLENGE</b>	A medical scanner manufacturer has to train operators on a new scanner device's software. The instructor has to switch between 4 computers. The operators will train on their own PCs but need the ability to independently switch to the instructor's monitor at anytime
<b>MINICOM SOLUTION</b>	Consolidate the instructors 4 PCs to 1 K/V/M using the Smart 4. Cascade the Smart 4 to the VDS Broadcaster. Each student operator uses a Smart 2 VGA portion only to switch b/w their PC monitor or the VDS remote monitor broadcasting the instructors screen.
<b>BENEFITS</b>	Students only need 1 monitor on their desks and can choose which video image to watch; Only CAT5 cable is run between the teacher and students desks.
