

Date - January 14, 2003
 Title - Military Training Video Display
 No - 010

ENVIRONMENT	School classrooms; Corporate Computer Based Training (CBT) rooms; Military CBT rooms
MINICOM PRODUCT	Video Display System (VDS)
CHALLENGE	A military training facility wants to project detailed computer screens to every computer display in a classroom.
MINICOM SOLUTION	Install the VDS Broadcasting Unit to the instructor's computer. Connect the VDS Remote unit to each student monitor. When the instructor wants to display a screen he/she hits a button on the small Control Unit. Each student monitor now displays the instructor's screen.
BENEFITS	Detailed screens can be projected directly onto each persons monitor and easily be seen instead of using a projector. The 2 button Control Unit is simple to operate. Low bulk CAT5 cable is used to connect the Broadcasting unit to each Remote unit.
